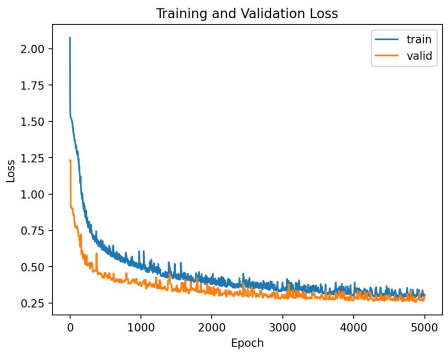
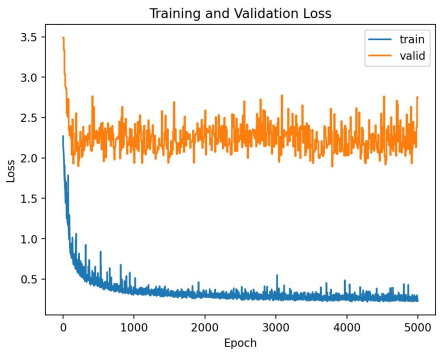
Mesh GNNs preliminary results

1st smoke-test Loss history



2nd smoke-test Loss history



Total Dataset: 1200 trajectories with 600 time-step each

- 1000 trajectories as training
- 100 trajectories as valid
- 100 trajectories as test

First smoke-test:

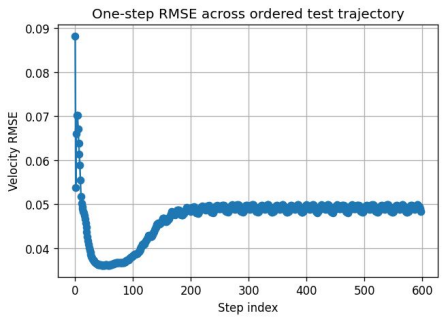
- split train into train & valid sets
  - 45 time-steps train
  - 10 time-steps valid

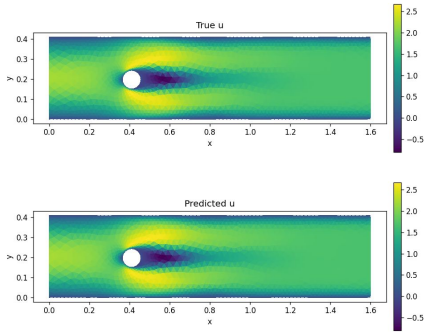
Second Smoke test:

- 500 time-steps of 3 trajectory as train
- 50 time-steps of 1 trajectory as valid
- also 1 trajectory for test

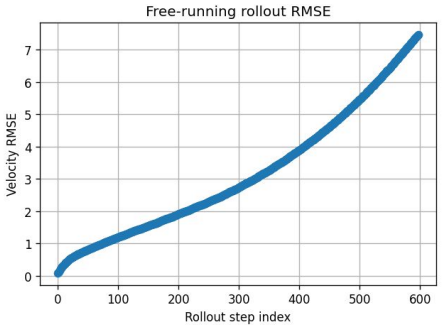
One-step vs. Rollout:

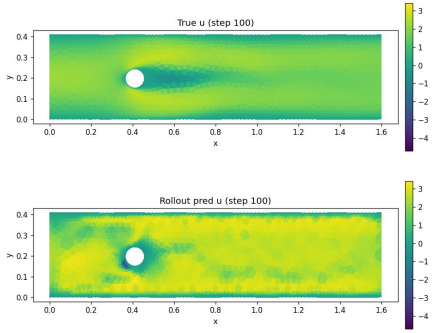
One-step test data RMSE

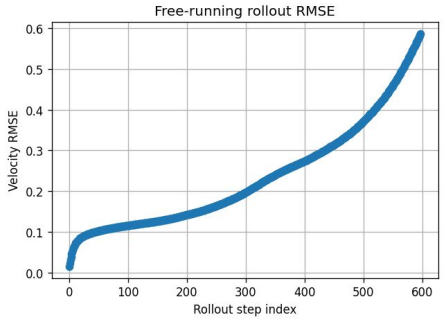


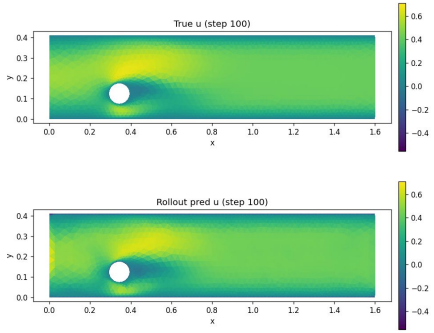


rollout for test data RMSE









rollout for train data RMSE
